

Summit Systems provides pipework installation as part of its project management services.

The Summit Systems technical team has 3 decades' design experience across a huge variety of projects. Its portfolio ranges from the very simple, to complex systems with many kilometers of pipework to install.

Material costs are kept low as Summit Systems Fabrications manufacture pipework components such as bends, distribution tables and angel hair traps.

A tenfold team of highly skilled pipework specialists with a plethora of project experience install pipework in the shortest possible time to market leading standards.

Complex external pipework

Installation of pipework

Benefits

- Award winning team
- 3 decades' project experience
- Lower cost via fabrications services
- Faster installs
- Highest quality
- Technical competency

Features

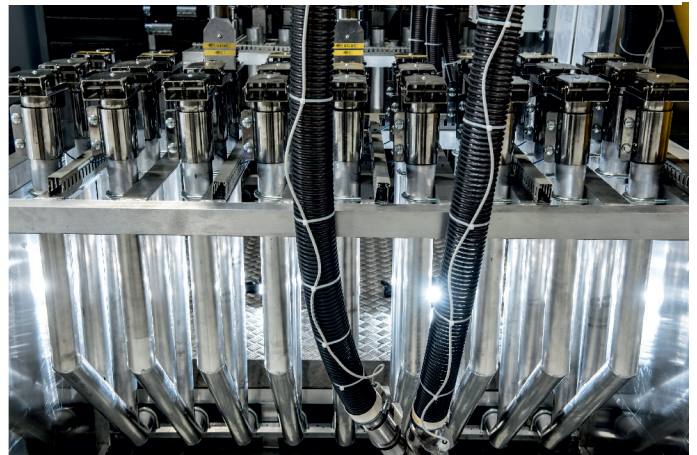

- 40, 50, 60 and 70mm diameters to meet flow rates
- Pipe available in stainless steel, ceramic or glass

PIPEWORK & COMPONENTS

Material Handling

Distribution & Selection Tables

Distribution & Selection Tables are available as part of a system providing the central organisation of your raw material distribution. Summit Systems design and manufacture these tables here in the UK to your exact requirements.

Benefits

- Eliminates manual shifting of polymer between storage and manufacturing area
- Removes pallets and bags of material from shop floor & enables the use of silo/bulk storage if required
- Reduces the need for fork lift and pallet truck use in the production area
- Promotes good 'housekeeping'
- Reduces dust levels in the production environment due to central filtration
- Eliminates manual lifting of material bags by machine operators
- Eliminates material spillage and wastage
- Power saving – one central vacuum unit replaces multiple vacuum motors
- When integrated with a central dryer eliminates waiting time for dried material

Features

- Aluminium – for non-abrasive materials
- Stainless Steel – for abrasive materials and food grade applications
- Manual & automatic selection with electronic identification PLC
- High performance couplings - quick
